

Assignment - 01:

Human class :

package com;

public class Human {

private String name;

private int age;

public String getName() {

return name;

}

public void setName(String name) {

this.name = name; // name = Shuron

public void setAge(int age) {

this.age = age;

public void speak() {

System.out.println(name + " is speaking...");

}

}

Music.java :

Package com;

Public class music {
 private String genre;
 Private String artist;

Public music (String genre, String artist) {
 this.genre = genre;
 this.artist = artist;
}

Public void Play() {
 system.out.println ("Playing" + genre + "music by
 + artist);
}

}

Main class:

```
Package main pack;
```

```
import com.Human;
```

```
import com.Music;
```

```
Public class main {
```

```
    Public static void main (String[] args) {
```

```
        System.out.println ("Human Object (using setter);
```

```
        Human h = new Human
```

```
        h.setName ("Sharon");
```

```
        h.setAge (22);
```

```
        System.out.println ("name: " + h.getName());
```

```
        System.out.println ("Age: " + h.getAge());
```

```
        h.speak();
```

```
        System.out.println ("\n Music Object (using  
                                constructor)");
```

```
        Music m = new Music ("Pop"; "Tay Taylorz Swift");
```

```
        System.out.println ("Genre: " + m.getGenre());
```

```
        System.out.println ("Artist: " + m.getArtist());
```

```
        m.play();
```
